

Who we are

Xké? (“perché” means “why?” in Italian) is an educational center where schools can find science activities (divided in 6 different sections). The entire name is “Why? The curiosity lab”.

The main goal of the Center is to approach science through creativity, curiosity and a playful experience.

Open in 2011 for school classes (6 to 13) Xké? is a project focused especially on the idea of an innovative teaching method and to close the gap between kids and science.

Organized in exhibits and based on the “hands on” method, kids are involved in group activities, games and positive competitions: they can learn by doing.

Visiting Xké? is not like going to see an exhibition or a traditional museum. It requires interaction, it stimulates kids’ curiosity with the overall goal of presenting them with a dynamic, unique learning experience.

Our activities

The Centre has six different spaces where the labs take place. By September 2015, the activities available for classes are more than 25; each teacher can choose the science lab more suitable for that class in that specific year (curricula).

List of the labs

The Italian version of the detailed labs and activities is available at the following link:

<http://www.laboratoriocuriosita.it/index.php/percorsididattici/>

Our experiences are all based on the “hands on” method. Classes can experience science, see phenomena, inquire thinking, using game as medium to tackle the essence of science, even in daily life.

Where we are

Located in the heart of Torino (Via Gaudenzio Ferrari, 1)

The Centre is open only to schools (6/13 years old).

Monday to Friday from 9 am to 5 pm.

Numbers

Every year, over 700 classes (6-13 years old) come and take lab activities @Xkè?

Every year, more than 15.000 students

Every year, more than 5.000 children during the summer (Summer Camp)
